Kangley Bridge Road Industrial Estate
Commercial Vehicle Route Map
October 2010

About this Map
This delivery map for Kangley Bridge Road Industrial Estate has been produced by South London Freight Quality Partnership, Transport for London and the London Boroughs of Bromley and Lewisham.

The map is intended to help drivers find their way to the entrance of Kangley Bridge Road Industrial Estate by using the overview map.

The map shows preferred access routes so drivers can find specific business locations as efficiently as possible, minimising the disturbance to local residents.

Drivers should remember that restrictions may not always be obvious, so the map may be useful both to regular drivers and those new to the area. For example, the London Lorry Control Scheme manages HGV movements on certain roads at night and over weekends. The area is also covered by the London Low Emission Zone. Operators are advised to plan their routes accordingly.

Businesses can help by promoting access routes on company letterheads, requisitions, purchase orders, making the map (or links to it) available from their own websites and promoting it to staff, suppliers and visitors when they are on site.

For further information, or if you have any suggestions about how to improve the map then please contact:
